Photo/video Taking Guide For Scaffolding Quotes

Please provide a video or multiple clear photos of the scaffolding location, including surrounding areas and site access, and send them via **WhatsApp**.
High-quality images and footage can help reduce costs.
For further guidance, you may refer to the detailed instructions below if required.

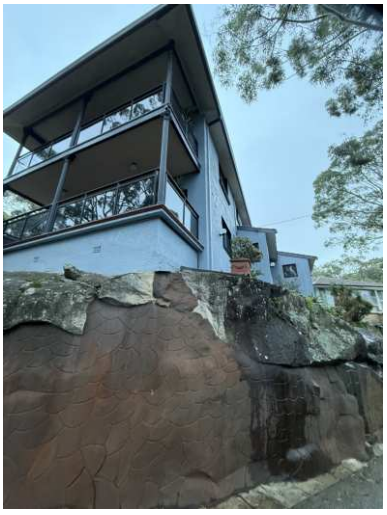

1. Take Wide Shots First
Stand back and capture the whole area where the work will take place. Take photos from at least 2-3 different angles.

2. Show Key Details Up Close
Take closer photos of specific areas needing work.

3. Include Access Points
Photograph driveways, gates, paths, or side access where materials and equipment will need to come through.

4. Highlight Obstacles & Hazards
Take photos of trees, slopes, powerlines, gardens, sheds or any uneven ground.

5. Show Measurements
Place a tape measure across narrow areas, or another object in the photo to show scale.

6. Additional Access Photos
Take a couple of pictures showing the space around the project site for long delivery access and the impact on parking
